# DRUM TYPE MIXER

**BCO-108**

**The Drum Type Mixer delivers  
a perfect homogeneous mix  
with its powerful and efficient  
design. With its sturdy body,  
high performance, and easy  
mobility, it is the ultimate  
choice for professionals in the  
construction industry!**

## DESCRIPTION

The Drum Type Mixer series is a high-efficiency mixing system designed for homogeneous mixing of wet and dry materials such as fresh concrete, plaster, and mosaic. The double-conical drum design ensures optimal material mixing and a uniform structure.

Available in different capacities, these mixers are suitable for a wide range of construction and building projects. With a durable and robust structure, they ensure long-lasting use. Thanks to its wheeled design, it is easily transportable and provides practical on-site usability.

The machine operates with an efficiency of 1.3 to 2.6 m³ per hour, allowing for significant time and labor savings. It weighs 56 kg and operates with a 220V power source. Its compact dimensions make it easy to store and transport.

The Drum Type Mixer is manufactured in compliance with TS EN 1766 standards, offering superior quality and safety performance.

## APPLIED STANDARDS

### ✓ EN 1766

Construction-specific European standard mixer.

### ✓ ISO 9001

Compliance with quality management system.

### ✓ CE CERTIFICATION

Conforms to European safety and quality standards.

### ✓ IP PROTECTION CLASS

Dust and water-resistant motor protection system.

PRODUCT CODE	PRODUCT NAME
BCO-108/4	Drum Tipi Mikser 140 lt
BCO-108/7	Drum Tipi Mikser 180 lt
BCO-108/8	Drum Tipi Mikser 125 lt
BCO-108/11	Drum Tipi Mikser 350 lt
BCO-108/12	Drum Tipi Mikser 250 lt

## FEATURES

- The mixer is available in different capacities.
- It has wheels, it provides ease of transportation thanks to its wheeled form.

- The efficiency of the device per hour is 1.3-2.6 m3.

- Weight: 56 kg

- Dimensions: app. 117x66x124cm

- Power 220 V, 0.7 Kw
